

INSPECTION REPORT

Automated ID is the easiest and fastest inspection software available on the market.

As soon as the inspection has been conducted with AIC (mobile device), the inspection reports are available to the user in PDF format.

Once the mobile device is synchronized, every user has access to the document

Automated ID safety inspection software, automates inspection process from the field to the management desktop.

Automated ID drives the risk management processes with proactive, actionable information that is accessible by executives, management and field personnel.

Automated ID

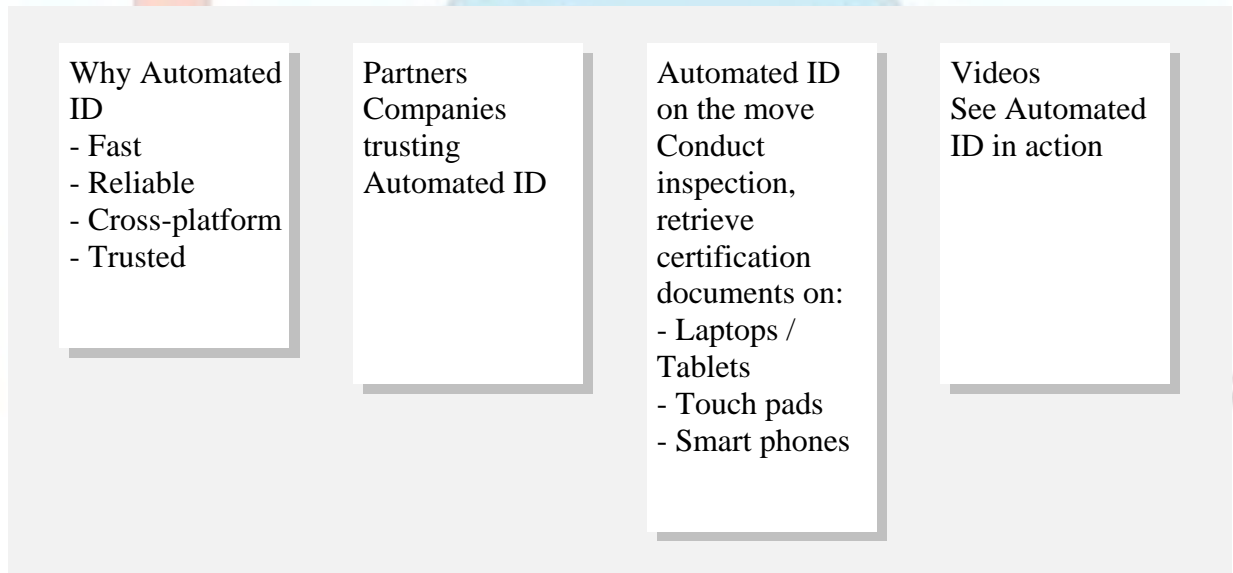

- Reports inspections.
- Alerts the users about upcoming inspections.
- Increases financial and safety performance.

Whether you're in oilfield, building maintenance, general industry or in public safety, Automated ID eliminates conditions that allow incidents to happen and reduce financial and personal costs through detailed inspection analysis.

Notifications:

- AI is designed to keep you ahead of the game
- Notifications are sent informing you of upcoming inspections required to keep your items valid
- Warnings are displayed when attempting to move an item that has expired or does not have a cert attached
- Reporting

AI provides a series of reports designed to provide you with views of your items
Have a report in mind? We can create what you need to get your job done
